Project Title: This Is Our House

I want to structure the site as a set of simple connected pages with a fixed top navigation. The design will reflect the evolution of house music, starting with Chicago club culture and expanding into a global movement. Each page will feature bold graphics and short text to keep the content rhythmic and energetic.

- **Home Page** Introduce what house music is, including the beat, the tempo, and where it started. Include a strong visual hero section to draw users in and set the tone.
- **How It Sounds** Show core characteristics of the genre such as the four on the floor rhythm, drum machines, basslines, and synthesizers. Include simple audio examples.
- **Where It Began** Cover the early Chicago origins with Frankie Knuckles, The Warehouse, and the communities that shaped the music.
- **Culture and Dance** Explain connections with Black, Latino, and LGBTQ+ club culture. Introduce dance styles like jacking and footwork.
- **How It Spread** Show how house traveled from Chicago to Detroit, the UK rave scene, Ibiza, and beyond, leading to subgenres that exist today.
- **Sources** List the Wikipedia House Music article and other credited references including image and audio sources.
